Dear Hiring Manager,

I am interested in the Front-end Engineer 1 position and eager to jump in and start helping! I am currently a Senior in High School. I am in a concurrent Web Development program at Jordan Academy for Technology and Careers. In this class we are learning HTML5, CSS, and JavaScript. My instructor informed me of your job openings. Alongside those valuable industry skills I am also learning professional soft skills with the two internships that I am currently working. I am a team player, hard working, dependable, and excited to learn.

The design and development of web pages is my passion. I love to design an intuitive and useful website. As of now I am an intern for a local middle school. I am responsible for adding new pages, updating content. While working on that website I was able to familiarize myself with wordpress. I also have an internship with a company that specializes in expo's for senior citizens, and vendors for their expo. While working with this company I have gotten some valuable experience in webflow and learned about all of the extensions and third party applications in order to make their website possible.

I would love to talk more, please email me so we can set up an interview. I will follow up with you in a week through phone. Thank you for your time and consideration!

Steven Lewis

Sincerely

Steven Lewis
